Objective

To obtain an internship as a software developer where I can utilize my skills and my education to explore career options.

Education

California State University, Fullerton

Expected: June 2017

Bachelor of Science, Computer Science

- Overall GPA: 3.1
- Received Dean's List in Spring 2014, Fall 2014

Technical Skills

Languages: C, C++, Python, Java, Assembly (x86-64), HTML, CSS, Javascript

Tools: GCC Compiler, Linux, Android SDK, Git, Sublime Text, Visual Studio, Graphviz, NASM

Code Samples:

- github.com/christarazi
- stackoverflow.com/users/2193236/chris-tarazi

Projects

Bitcoin Calculator App (*Java/Android*)

- Published an Android app to calculate profit margins and break-even points using Bitcoins.
- Implemented CoinDesk API to fetch latest Bitcoin price index using JSON.

Fortune Generator (*Python/Django, HTML, CSS*)

- Created a fortune generator webpage that queries a sqlite database.
- Fetches a random image from Flickr public API feed using BeautifulSoup4.

Red-Black Tree (*Python, Graphviz*)

- Implemented a full featured Red Black Tree with N nodes.
- Generated a visual representation in a PDF file format of the tree using Graphviz dot syntax.

Multithreaded Harmonic Series Sum (*C++*)

- Implemented multithreading capability to efficiently and quickly compute the harmonic sum to N terms.

Work Experience

Zepp Signs and Banners, Long Beach, CA

June 2011-Present

Computer Repair Technician

- Work with clients to identify and repair their computer problems.
- Write diagnosis reports detailing the causes and effects of client's computer symptoms.
