## Education

---

### California State University Fullerton

Expected: June 2017

*Bachelor of Science, Computer Science*

- Overall GPA: 3.1
- Received Dean's List in Spring 2014, Fall 2014

## Technical Skills

---

**Languages:** C, C++, Python, Java, Assembly (x86-64), HTML, CSS, Javascript

**Tools:** GCC Compiler, Linux, Android SDK, Git, Sublime Text, Visual Studio, Graphviz, NASM

**Code Samples:**

- [github.com/christarazi](https://github.com/christarazi)
- [stackoverflow.com/users/2193236/chris-tarazi](https://stackoverflow.com/users/2193236/chris-tarazi)

## Projects

---

Bitcoin Calculator App (*Java/Android*)

- Published an Android app to calculate profit margins and break-even points using Bitcoins. Implemented CoinDesk API to fetch latest Bitcoin price index using JSON.

Fortune Generator (*Python/Django, HTML, CSS*)

- Created a fortune generator webpage that queries a sqlite3 database and fetches a random image from Flickr public API feed using BeautifulSoup4.

Red-Black Tree (*Python, Graphviz*)

- Implemented a Red Black Tree with N nodes and generated a PDF file visual representation of tree using Graphviz dot syntax.

Harmonic Series Sum (*Assembly*)

- Implemented vector processing to efficiently calculate the harmonic sum to N terms with double-precision format.

## Work Experience

---

### Zepp Signs and Banners, Long Beach, CA

June 2011-Present

*Computer Repair Technician*

- Work with clients to identify and repair their computer problems.
