(949) 374-2188

Education

California State University Fullerton

June 2016

Bachelor of Science in Computer Science

- Overall GPA: 3.1
- Received Dean's List in Spring 2014

Technical Skills

Languages: C, C++, Python, Java, Assembly (x86-64), HTML, CSS, Javascript

Tools: Android SDK, Git, Sublime Text, Visual Studio, Graphviz

Code Samples:

- github.com/christarazi
- stackoverflow.com/users/2193236/chris-tarazi

Projects

Bitcoin Calculator App (*Java/Android*)

- Created an Android app to calculate profit margins and break-even points regarding Bitcoin trading. Implemented CoinDesk's API to fetch latest Bitcoin price index using JSON.

Fortune Generator (*Python/Django, HTML, CSS*)

- Implemented a fortune generator that queries a sqlite3 database and fetches a random image from Flickr's public API feed using BeautifulSoup4.

Red-Black Tree (*Python, Graphviz*)

- Implemented a Red Black Tree with N nodes and generated a PDF visual representation of tree using Graphviz dot syntax.

Harmonic Series Sum (*Assembly*)

- Implemented vector processing to efficiently calculate the harmonic sum to N terms with double-precision format.

Work Experience

Computer Repair Technician

June 2011-Present

Zepp Signs and Banners

Long Beach, CA

- Worked with clients to identify and repair their computer problems.
